AFFILIATE JOURNALS

REVIEW COMMONS

Review Commons helps you find a journal home quickly by providing transparent peer review of preprints.

Submit your preprint for peer review at Review Commons to receive high-quality referee reports that focus on your research and not on journal fit. Then you can:

- post a reviewed preprint publicly to make your research count while it still matters (for grants and jobs applications, promotions, etc.)
- submit your reviewed preprint directly to our affiliate journals without undergoing new peer review.

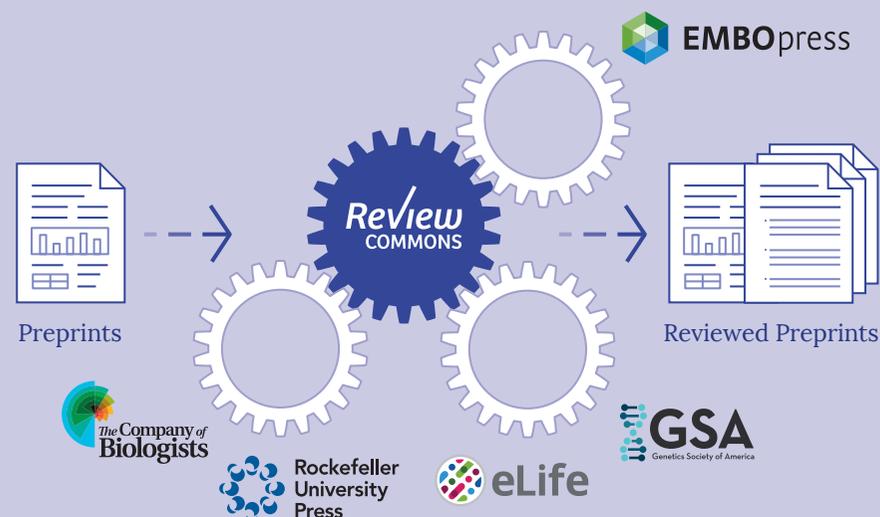

Review Commons is free of charge for authors thanks to the contributions of our affiliate publishers.

PUBLISHERS JOIN FORCES

Authors benefit from the expertise of multiple editorial teams who cooperate to find reviewers.

HOW REVIEW COMMONS WORKS

BRINGING REVIEW COMMONS TO LIFE

Review Commons is powered by EMBO, the European organization promoting worldwide excellence in the life sciences by recognizing and connecting talents and shaping the research ecosystem through policy and innovation in knowledge dissemination.

Review Commons is made possible by publishers and editors who share the EMBO commitment to the advancement of science through the open sharing of peer-reviewed research.
